

Briefly describe your experience with the M&S knowledge and skill set listed below. If you don't have experience in one or more of the six areas, please indicate by N/A. The CMSP Certification Board is looking for your overall experience and as such, not all the knowledge & skill set areas listed are required.

<p>Ability to independently plan and lead complex M&amp;S technical projects.</p>	
<p>Ability to conduct research broadly applicable to M&amp;S.</p>	
<p>Ability to convey the level of confidence and/or risk associated with M&amp;S-based findings.</p>	
<p>Capability to derive and specify high level and detailed requirements with measurable acceptability criteria.</p>	
<p>Demonstrated knowledge of the most current and up-and-coming technologies and methods related to M&amp;S systems, including visualization, virtual and augmented reality, machine learning, and artificial intelligence.</p>	
<p>Demonstrated advanced knowledge of general M&amp;S concepts and broadly applicable methods.</p>	
<p>Demonstrated ability to present M&amp;S designs, implementation architectures, and results to other M&amp;S professionals and to senior leaders.</p>
